DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

"Food based bait" is ambiguous; no food or % thereof is specified in the claim, so it is unclear what patentable weight to give this presumed limitation.

The % is not stated as to what the basis is-the pectin, insecticide, total compositions or jelly bait.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 ARE rejected under 35 U.S.C. 102(b) as being anticipated ROJAS et al 6916469.

ROJAS (column 2, lines 31-46) teaches Ca, low methoxyl pectin (less than 1000 units) food-based bait attractant and insecticide (claim 3, and Table 2-boric acid) or deltamethrin (column 3, lines 53-58) at the instant %. A food based bait of corn starch is 1.3% (claim 3). Boric acid at 10% (column 3, lines 58-60) is at 25% of the food based attractant (38.9% in claim 3). The % as organic phosphates is at 0.001-10%, and is included in the "any-toxicant" (column 3, lines 54-60). The instant claims do not require organophosphates, but when present would be at 0.5-3%, and selected from chlorprifas of the instant claims 7 and 8.
